Havana, Cuba · +53 5951 34 90 · isaitodaniel@gmail.com · [GitHub](#) · [LinkedIn](#) · [Portfolio](#)

Computer Science Engineer with 3+ years of software development experience and a strong focus on modern web technologies, frontend architecture, and product development. Experienced in building web and mobile applications using React, React Native, Vue, Quasar, [Node.js](#), PostgreSQL, and modern JavaScript ecosystems. FullStack Developer of TuPincha, a local services platform designed to connect customers with service providers through a scalable and user-friendly experience. Passionate about building real products, AI-assisted development workflows, and delivering high-quality user experiences.

PROFESSIONAL EXPERIENCE

TuPincha (App Mobile new version) – Lead Developer

Havana, Cuba

FullStack developer - React Native | Expo | Supabase | PostgreSQL | Google Maps

December 2025– Present

- Led the development of a mobile platform that connects customers with local service providers through location-aware discovery, service requests, and real-time communication features.
- Designed and implemented provider geolocation workflows using Google Maps integration, enabling users to locate nearby professionals and improving service visibility across different regions.
- Built the authentication and user onboarding system using Google Sign-In and Supabase Authentication, providing a secure and streamlined registration experience.
- Developed the backend architecture on Supabase, including relational database design, Row Level Security policies, RPC functions, and Edge Functions to support scalable business workflows.
- Implemented internal messaging capabilities and push notification systems to improve communication between customers and service providers and increase user engagement.
- Designed reusable frontend components and application flows focused on mobile-first usability, maintainability, and long-term scalability.
- Leveraged AI-assisted development workflows, context engineering techniques, and agent-based tooling to accelerate prototyping, component development, documentation, and technical decision-making.

TuPincha (Landing Page still development)

Havana, Cuba

FrontEnd developer - React | Vite | Tailwind CSS

May 2026– Present

- Designed the product's public-facing web presence to support customer acquisition and communicate key platform features.
- Built a responsive, mobile-first interface optimized for different screen sizes, ensuring a consistent experience across smartphones, tablets, and desktop devices.
- Implemented reusable UI components and modern frontend architecture patterns to improve maintainability, scalability, and future feature development.
- Optimized website performance through image compression, WebP asset delivery, lazy loading techniques, and efficient resource management, improving loading times and user experience.
- Designed interactive sections and animated user flows to increase engagement while maintaining accessibility and performance best practices.
- Structured the application using SEO-friendly practices and semantic HTML to improve discoverability and support future marketing initiatives.

Ecommerce – University Thesis Project

Havana, Cuba

FrontEnd developer - Vue 3 | Quasar | Pinia | Axios | JWT | Stripe | Scrum

February 2025–July 2025

- Integrated Stripe payment workflows for secure transaction processing in a testing environment.
- Applied JWT authentication mechanisms to protect user access and sensitive information.
- Followed Scrum practices with iterative planning and continuous project reviews.

Frontend Mentor Projects (Landing Page still development)

FrontEnd developer - HTML | CSS | JavaScript | GitHub Pages

Havana, Cuba
October 2024–December

2024

- Developed multiple frontend projects focused on responsive design, accessibility, and modern user interfaces published through GitHub Pages.

Global Game Jam Participant (2024 & 2025)

Game developer - Godot | GDScript | Team Collaboration

- Collaborated in multidisciplinary teams to develop game prototypes under 48-hour deadlines.
- Contributed to gameplay systems, interaction mechanics, and rapid prototyping using Godot.
- Strengthened communication, teamwork, and problem-solving skills in high-pressure environments.

University of Computer Sciences (UCI)

Computer Science Engineering

Havana, Cuba
April 2022–July 2025

TECHNICAL SKILLS

- Frontend: React, React Native, Expo, Vue.js, Quasar Framework, TypeScript, JavaScript, HTML5, CSS3, Tailwind CSS, Pinia, Vite
- Databases: PostgreSQL, Supabase, SQL
- Tools: Git, GitHub, Stripe, Axios, JWT, Scrum.
- AI & Agentic Development: Prompt Engineering, AI-Assisted Development, Context Engineering,
- MCP (Model Context Protocol), Agentic Workflows

OTHER SKILLS

- Spanish (Native) • English (B1+) • Teamwork • Problem Solving • Adaptability • Continuous Learning • Communication
